

SUPPLEMENT TO THE OCTOBER 2013 MARKET STUDY BINDER

IMPORTANT NOTES: Since the inception of Matrix in August of 2013, there have been changes in the datasets being obtained from our various MLS systems, which consequently affect the quality and consistency of reports being prepared for John R Wood, as opposed to data being collected directly from the MLS databases.

It should be noted that several reports, as they are currently being prepared, will never produce the same numbers as those published in the Matrix Statistics section or by NABOR. This is a result of our attempts to remove records which are known duplicates in the case of active and closed reports. Also, in the case of Pending studies, we have gone in and manually removed what would represent “Duplicate changes” such as when a record goes from A>PC, then PC>P. However, if the same listing goes from active to Pending or PC twice within the study period, it is counted twice, as has been the custom in the past.

During the month of October, the Fort Myers board joined our Matrix system, which has further compounded the issues of duplications. After identifying over 240 duplicate records in the October closed data, the decision was made to exclude data input from the Fort Myers Board from our NA, BN, and ES geo code studies, in an effort to maintain some consistency through the balance of 2013. The chart below shows a breakdown by geocode of the records we’ve identified as being duplicates, which currently reside in the Matrix system.

However, the decision to omit data input by members of the Fort Myers board also means that well over 200 closed records for these areas, which do not appear to be duplicates, will not be included in our closed reports for the remainder of this year. Consequently, again, these reports will not line up with anything being reported through Matrix or NABOR reports. The chart below shows a breakdown of those closed records in NA-BN-ES geocodes, contained in the Fort Myers Data, which have not been identified as duplicates, and likely represent unique records, which have in fact closed since the beginning of the 2013 calendar year.

Duplicate data in all records with active or pending status have yet to be reviewed.

As of this date, it is our understanding that new records continue to be entered into the Rappatoni system within the Fort Myers board. Whether or not these records are then being migrated to the new Matrix system seems questionable, as it has been reported that not everything is showing up in Matrix. It is also questionable whether some of the records being entered in Rappatoni are also being input through the Matrix system, which would ultimately result in further duplications. Supposedly, Rappatoni will be kept active until the end of the 2013 calendar year. This will have to be reviewed prior to our data collection beginning with the new 2014 year, and decisions will have to be made at that time as to how we can or will handle duplicates and other remaining issues on an ongoing basis.
